Bangalore, Karnataka

PROFESSIONAL OBJECTIVE

Entry-level software developer skilled in Java, Python, and JavaScript with hands-on experience in Flask, and React.js. Built full-stack web apps and basic ML tools through academic projects. Strong foundation in data structures and Machine Learning. Eager to contribute to ML Engineer and Software Developer roles.

EDUCATION

Don Bosco Institute of Technology

Dec 2022 - Jun 2026

Bachelors of Engineering in Artificial Intelligence & Data Science

Bengaluru

9.2 CGPA

Relevant Courses: Java Programming, Python Programming, Data Structures & Algorithms, Machine Learning

Santhome PU College

Jul 2020 - Apr 2022

Pre-University College

Mandya

Percentage 90.5

Physics, Chemistry, Mathematics, Biology

SKILLS

- **Programming Languages & core concepts:** Java, Python, JavaScript
- **Web Technologies:** HTML, CSS, React.js
- **Full Stack & Database Technologies:** Java Full Stack, MYSQL, MongoDB
- **Data Visualization & ML Tools (Basics):** PowerBI, Tableau, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

EXPERIENCE

Internship Studio

Mar 2025 – May 2025

Machine Learning Intern

- Gained hands-on experience in ML model development, data preprocessing, and analysis.
- Built and evaluated models using Python and Scikit-learn.
- Demonstrated strong problem-solving and project execution skills.

PROJECTS

AIKYRA: AGI Agent for Auto Execution via LLM

Mar 2025 – Oct 2025

- Designed and implemented an AI-powered productivity platform integrating task automation, code generation, and contextual chatbot support.
- Built with Python, Flask, HTML, CSS, JavaScript, and SQLite3 for a responsive, scalable web interface.
- Integrated Gemini API for AI-generated professional email notifications and reminders.
- Implemented AI Code Assistant supporting multi-language code generation and execution for developers.

ReportGen AI – Automated Data-to-Insights Generator

Aug 2025 – Oct 2025

- Built a Generative AI-based automation tool that converts raw datasets into summarized insights and performs automated exploratory data analysis (EDA), handles missing value, generates visualizations, provides machine learning insights and generates structured reports.
- Implemented using Python, Pandas, NumPy, and LLM APIs (OpenAI/Gemini) for data cleaning, analysis, and natural language summary generation. Deployed the model using a Streamlit web app with an interactive interface for generating automated reports and visualizing ML insights.

Manufacturing Equipment Output Prediction –TNS project

Oct 2025

- Developed a linear regression model to predict hourly production output using key machine parameters.
- Performed comprehensive EDA, data preprocessing, model evaluation, and deployed the solution using FastAPI Streamlit.

CERTIFICATIONS

Java Full Stack Development

Oct 2024 - Apr 2025

ROOMAN TECHNOLOGIES PRIVATE LIMITED

Certified in SQL, Core Java 8, HTML5, CSS3, JavaScript, React, and soft-skills

Artificial Intelligence & Machine Learning Foundations

Jul 2025 – Nov 2025

TNS India Foundation
