CAREER OBJECTIVE

Motivated AI & Data Science student with strong fundamentals in machine learning, problem-solving, client communication, and full-stack development. Seeking an AI/ML & Business Development Intern role to contribute to data-driven decision-making, product research, business growth, and model development while gaining real-world industry exposure.

TECHNICAL SKILLS

Programming: Python, C, Java (Basics)

Web: HTML5, CSS

ML & Data: Flask, Scikit-learn, Pandas, NumPy, Power BI, Tableau

Tools: VS Code, Git, GitHub

Core CS: OOP, DSA

Soft Skills: Problem-solving, Collaboration, Adaptability, Attention to Detail

EDUCATION

Don Bosco Institute of Technology, Bengaluru

Bachelor of Engineering in Artificial Intelligence and Data Science

2022-2026

CGPA: 8.89

St Annes girls pu college, Channapatna

Senior Secondary (Class XII)

2020-2022

Percentage: 91%

St Annes girls high school, Channapatna

Secondary (Class X)

2019 - 2020

Percentage: 96%

EXPERIENCE

Edunet Foundation

(Nov 2024 - Feb 2025)

- Built and optimized web app components used for internal dashboards and client-facing applications.
- Collaborated with teams to identify feature requirements supporting business needs.
- Improved user experience using API integrations, debugging, and version control (Git).
- Gained experience in SDLC and cross-functional communication.

PROJECTS

Job Tracking Web Application (Full-Stack Project): Developed a responsive app with authentication, real-time status updates, and an interactive dashboard. Strengthened full-stack, API integration, and database management skills.

Auto Execution via LLM — Aikyra (AI+ Automation Project): Designed and developed a modular AI assistant integrating LLMs with rule-based automation for context-aware task execution. Worked on multi-layered architecture, Flask API integration, and PWA deployment.

AgroVision AI – Agricultural Decision Support System

Built an AI-based system using **Random Forest and CNN models** for real-time **crop prediction and plant disease detection**, deployed via a **Flask web application** for practical agricultural use.

Traffic Volume Prediction — ML Project

Built a machine learning model using **Random Forest & XGBoost** to predict hourly traffic volume, deployed via **Flask web app** for real-time urban traffic forecasting.

CERTIFICATION

Infosys Springboard – Basics of Python

Udemy-Complete Python with DSA Bootcamp+LEETCODE exercise

Building Modern Web Applications with MERN Stack – Next Gen Employability Program (AICTE & EY & Edunet Foundation)
2024–25
